

Overview

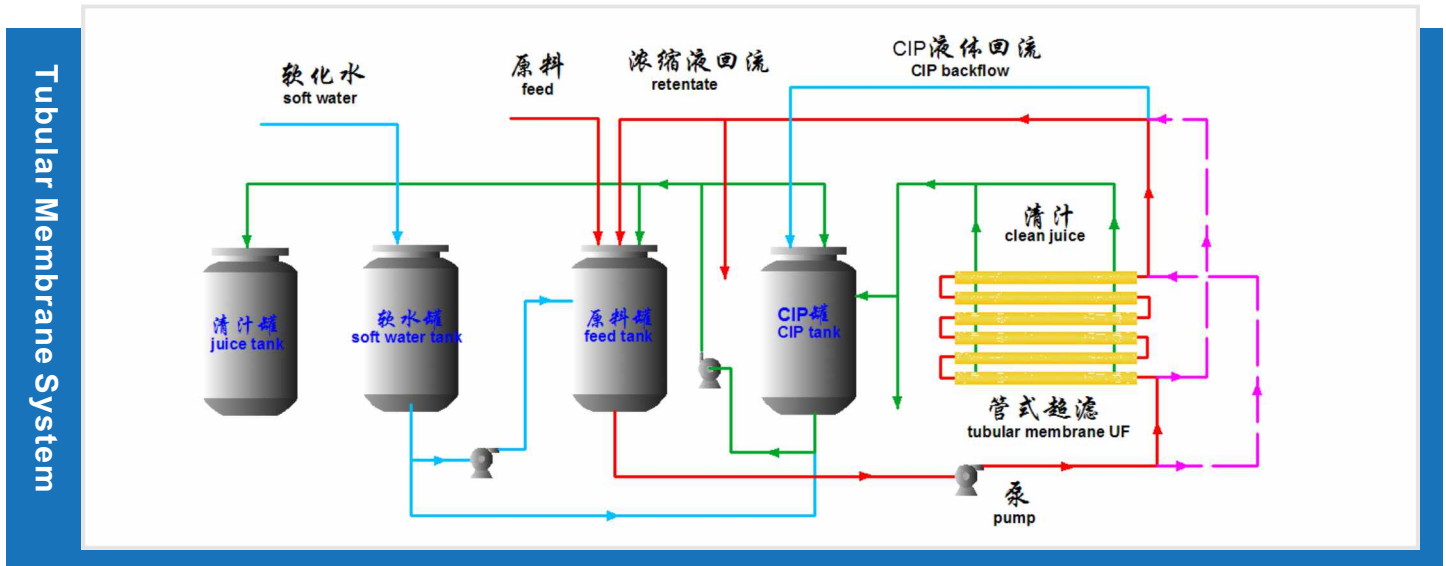

For fruit & vegetable juice filtration, membrane system can effectively remove bacteria, pectin, rough protein; retain nutrient and original flavor at the same time. No additive, no pollution.

Kaimi has manufactured more than 200 sets UF membrane systems for juice clarification to juice plants in China, total capacity over 400m³/H, occupied 90% of Chinese market, exported to many other countries as well.

Project Brief

Project Location	Dalian, China
Treatment Capacity	600m ³ /D
Started at	June of 2010
Membrane Model	KMTC-J-PU-0412
Specification	12.5mm PVDF, UF100C
Membrane Type	Sanitary Membrane Module
Designed Flux	70LMH
Membrane Per Set	80pcs
Component Distribution	5×16/Set
Treatment Capacity Per Set	30m ³ /H

Project Overview

Processible Typical Juice

Apple Juice

Pear Juice

Pomegranate Juice

Peach Juice

Pineapple Juice

Orange Juice

Blueberry Juice

Mulberry Juice

Tomato Juice

Carrot Juice

Cucumber Juice

Kiwi Fruit Juice

Partial Clients

Jiangsu Kaimi Membrane Technology Co., Ltd
